10TH ANNUAL IACP CONFERENCE TO BE HELD IN BEIJING

第十届中国规划学会年会将在北京举行

The 10th Annual International Association for China Planning Conference (IACP) will be held at Peking University, in Beijing, China, June 30th to July 3rd, 2016. At this conference, IACP will bring together planners, designers, scholars, scientists, and government officials from both China and around the world to exchange their ideas on the theme, "Governance and Planning in Transitional China".

Four decades after its economic reform in the late 1970s, China is still undergoing rapid urbanization and socio-economic change. Planning, as an important government function in China, has played a critical role in facilitating its urbanization process. At this critical junction of China's repositioning its development strategies and seeking solutions to respond to a wide range of socio-economic, equity and environmental problems, governance and its relationship with planning has become more important than ever before. Governance is the exercise of political, economic and administrative authority in managing urban and rural development and its people's well-being. Effective governance will provide the mechanisms, processes, and institutions through which planning performs as public policies, and government, citizens, and other stakeholders articulate their interests, mediate their differences, and exercise their legal rights and obligations.

Peking University will be our local host for the conference. Peking University is an important center for research and training on theories and practices of urban and rural planning in China. At Peking University, urban planning related disciplines are taught by the College of Urban and Environmental Sciences, the School of Government, the College of Architecture and Landscape Architecture, the PKU Shenzhen Graduate School, the Peking University - Lincoln Institute Center for Urban Development and Land Policy, and the Institute of Remote Sensing and GIS. The School of Architecture and Design (SAAD) at the Beijing Jiaotong University will also be co-organizing the conference.

Abstracts are due by January 31st, 2016. Please visit the IACP website (www.chinapanning.org) for the Call for Abstracts and submission instructions.

第十届中国规划学会(IACP)年会将于2016年6月30日至7月3日在中国北京举行。此次会议的主题为“转型中国的城市治理与规划”。IACP年会将邀请来自中国和世界各地的城市规划师、设计师、工程师、学者和政府官员进行学术交流。

改革开放以来,中国的城市化取得了举世瞩目的成就。作为政府管控和推动城市发展的重要政策工具,城市规划在中国快速城市化和经济增长的过程中发挥了极其重要的作用。与此同时,中国的社会与经济环境也经历了深刻的变迁。目前,城市建设面临着粗放低效、管理水平不高、社会问题突出、区域发展水平不协调,空间结构不合理、城市规模与资源环境承载能力不匹配等一系列问题。如何应对越来越凸显的社会矛盾,环境问题,经济成果的公平分配等问题已经成为中国未来持续健康发展的主要挑战。实现城市化从过去的数量扩张到未来的质量优化,提升城市治理水平、推动城乡治理现代化以及处理城市规划与城市治理的关系是关键研究课题。

会议承办方北京大学创办于1898年,是中国第一所国立综合性大学。北京大学城乡规划学科主要分布在城市与环境学院、政府管理学院、建筑与景观学院、深圳研究生院、林肯研究院、遥感与地理信息系统研究所以及其他相关学院,是中国城乡规划理论与实践研究以及高端人才培养的重镇。北京交通大学建筑与艺术学院也将协办部分会议活动。

论文摘要投稿将在2016年1月31日截止。具体的投稿和提交信息,请参考IACP官方网站。

ference theme and objectives, introduced keynote speakers and distinguished guests, thanking the local host, as well as the conference co-organizers and sponsors. Professor Wanmin Zhao delivered introductory remarks, as well as introducing the unique academic offerings and research accomplishments in the School of Architecture and Urban Planning at Chongqing University. Professor Chunlan Du, the party secretary of SAUP at Chongqing University, wishing all a happy dragon boat festival. Professor Wanmin Zhao and two internationally renowned scholars were each invited to give a Keynote Speech at the opening session.

Gary Hack (Professor and Dean Emeritus at University of Pennsylvania) delivered the first keynote speech of the conference, entitled "Disruptive Change and the Patterns of Cities". As one of the world renowned practitioners and educationists in design and planning, Hack demonstrated how designers and planners may respond to the future change of urban life. After reviewing the evolution of urban spatial frames in Barcelona, Spain and Beijing, China from the middle of 19th century and present, he pointed out the future drivers of change in cities, including economic shifts, technology, socio-organization, and public policies. He presented a variety of creative urban design projects in networked work and living environments. The projects included showing how driverless cars and smart vehicles have the ability to bring the new mobility to urban residents and change the infrastructure of cities, selected projects also demonstrated by the implementation of crowdsourcing ideas in urban construction projects, describing the plans for urban eco-sustainability using some innovative design for preventing storm surges from flooding cities as examples. Finally, he highlighted the roles for the academy in responding to the changes.

Professor Wanmin Zhao delivered the next keynote speech, entitled "Theories and Practice of Human Settlements in Mountainous Regions Research". In the first part of his presentation, Zhao reviewed the scientific research of human settlements

的巴塞罗那和中国北京自19世纪以来直到目前的研究，他指出将来城市变化的驱动力来自于经济转型，技术，社会组织，和公共政策。他介绍了一些有创意的城市设计项目，有关于网络工作和生活环境，包括无人驾驶汽车，智能汽车会给城市居民的出行带来新的变化和城市基础设施变化，众筹思想的实施在城市建设项目应用，和城市生态可持续计划使用创新思维防止暴雨洪水。最后，他强调了学术界在此变化中的角色。

赵万民教授作了第二个主旨演讲，‘山地人居环境的理论与实践’。在他的演讲的第一部分，赵教授提出解决基础设施和定居点的山区建设的科学问题。他强调相关规划问题的复杂性，并提出由他的团队重庆大学完成了一些勘探项目。在第二部分中，赵教授提出了中国西南地区的山区人类住区，包括在三峡库区的可持续发展项目，研究城市化在山区，生态和环境安全建设项目在流域地区的一些案例研究，保护历史文化名镇西南山区，以及在巴渝地区本地化风格架构。最后，赵教授总结了的山地人居建设科学思想。

彼得高顿教授（南加大）发表了第三个主旨演讲，题目是‘经济发展，城市，网络：交易费用的演变’。首先，高顿教授介绍了城市发展

in mountainous areas. He highlighted the complexity of the relevant planning issues, emphasizing the pressing needs for ongoing research on this topic. In the second part, Zhao described the theories and practices of human settlement research in mountainous areas. He pointed out several important scientific problems in the research, summarizing the theories proposed in his recent publications. Zhao also presented selected case studies of construction projects for human settlements in the mountainous areas of Southwest China, including the sustainable development projects located in the Three Gorges Reservoir area, pilot design projects for an urban community in a mountainous city, and pilot design projects for rural villages in the Southwest Mountain Areas. Finally, Zhao gave a summary about his scientific thinking on the construction of human settlements in mountainous areas.

Peter Gordon (Professor Emeritus at University of Southern California) gave the third keynote speech, entitled "Economic Development, Cities, Networks: the Evolution of Transactions Costs". First, Gordon addressed the growth of cities and how they contribute to economic development. He emphasized the complex and spontaneous supply chains, networks, spatial organizations, and the evolution of transactions costs. He demonstrated that human life in China and many other countries has shown significant improvement in recent years due to economic development. He discussed the factors explaining economic development via an economic growth schematic. Secondly, Gordon discussed how cities are the engines of growth by offering networking, agglomerating, and clustering opportunities. He highlighted the importance of spatial choice, spatial specialization, and spatial organization that allows cities to survive and grow by facilitating complex supply chain coordination problems, as well as facilitating entrepreneurship. Thirdly, Gordon provided evidence for the spatial order of activities in urban areas, including U.S. evidence for the successful co-location of workers and jobs. He challenged conventional wisdom in urban planning having to

和对经济发展的贡献。他强调复杂和自主供给链，网络，空间组织，和交易费用。他解释说中国和一些其他国家由于经济发展生活水平有了很大提高。他讨论了通过经济成长带来的经济发展。第二，高顿提出了城市是成长的动力源，通过网络，集聚，和聚集机会。第三，高顿列举了城市活动空间秩序的例证，包括美国对工作机会和劳动力的结合。他挑战了传统城市规划观点，城市外延，交通堵塞，和‘非规划’城市。第四，高顿诠释了经济成功的概念，和如何获得‘简杰克布’效应。他也列举了经济成功的影响因子，可持续发展，和讨论了由上而下和由下而上等规划类型。

do with urban sprawl, traffic congestion, and seemingly “unplanned” cities. Fourthly, Gordon tried to address questions of what constitutes economic success, what is city success, and how to get Jacobsean (re Jane Jacobs) outcomes? He also presented possible indicators of economic success, sustainable growth, discussing top down and bottom up strategies for different types of planning.

PARALLEL SESSIONS

The 2015 IACP conference had 199 papers presented within 45 parallel sessions structured into the following themes: “Historical and Theoretical Foundations”; ‘Transportation and Land Use’; ‘Housing and Community Development’; ‘Labor Force and Economic Development’; ‘Urban Design’; ‘International Best (and Worst) Practices’; ‘Analytical Methods’; ‘Planning for Public Health’; ‘Environmental Planning’; ‘Public Finance’; ‘Public Participation’; ‘Historical Preservation and Urban Renewal’; and ‘Big Data and Urban-Rural Planning’. Transportation planning was especially well-represented, with multiple special issue sessions and panels discussing the topics of transportation networks and management, high speed rail, transit and development, car ownership, subway and behavior, travel behavior, walk/bike behavior, commute behavior, TOD and transit, and mobility and accessibility. In addition to transportation, it included several other special issue sessions on the topics of the environment, special population, and migrants’ behavior. It also offered a roundtable discussion on housing and community development with perspectives from China, as well as the U.S.

闭幕式

闭幕仪式由大会主席潘起胜（德克萨斯南方大学）和赵万民（重庆大学）主持。另外三个教授发表了主旨演讲。

吴志强教授（同济大学）发表了‘在新型城镇化下体验城市结点’的演讲。吴教授阐述了过去10多年中国经济发展过程和城市化超过50%的国家发展轨迹。他比较了城市化率和人均GDP的关系，也比较了G20国家过去50年智能投入，产出，人力资源，和组织架构。他指出中国正面临不同形态的城市化进程的分界点，包括已发展地区和未发展地区。他的结论是智能城市化是中国未来不可避免的前途。

毛其智（清华大学）发表了‘新型城镇化和空间规划系统的建立’的演讲。首先，毛教授强调了中国中央政府在2013年召开的有关城市化的工作会议，主要课题是建立一个空间规划系统，提倡规划改革，加速规划制度来建立统一的规划系统。其次，他解释了什么是空间规划以及中国目前空间规划现状。接下来，他介绍了德国的空间规划模型。最后，他建议如何建立空间规划系统和进行规划改革。

the economic growth in China over the past decades and plotted out the paths of development for countries at urbanization ratio over 50%. By examining the relationship between this urbanization ratio and per capital GDP, intellectual input, output, human capitals, and institution structures in G20 countries over the past 50 years, Wu illustrated the major differences between intelligent urbanization and labor urbanization. He pointed out that China is approaching the turning point of different types of urbanization, as well as facing the urban challenges of both developed regions and developing regions. He concluded that intelligent urbanization is the inevitable and natural choice of China for its future development.

Professor Qizhi Mao (Tsinghua University) gave a speech, entitled "New Urbanization and the Establishment of the Spatial planning system". First, Mao highlighted the statements from China's central government at the urbanization working conference in 2013 that one of the main objectives to promote urbanization in China is to establish a spatial planning system, promote planning reform, and to accelerate planning legislation to form a unified planning system. Next, he explained the definition of spatial planning, presenting the status-quo of spatial planning in China. He then described the German model of spatial planning system. In conclusion, he offered suggestions how to establish the spatial planning system and carry out planning reform.

Professor Genevieve Giuliano (University of Southern California) delivered the third keynote speech, entitled "Transportation and Land Use: What do we Know About Freight". Giuliano introduced her studies on urban freight transportation. She presented a conceptual framework within which to explore the relationship between development density and urban freight problems and how to investigate how land rent may affect freight dynamics. She used population and employment density as proxy for freight demand and tested the relationship between density and freight flow volume in Los Angeles and San Francisco. Her empirical studies reported remarkably similar results across model forms and metro areas and the results confirmed the relationship between density and urban freight.

After the keynote speeches, Qisheng Pan and Wan-

简·朱莉安洛教授（南加大）作了第三个主旨演讲，题目是“交通和土地使用：关于货运的探讨”。朱莉安洛介绍了她在此方面的研究。她通过一个概念结构来探索发展密度和城市铁路货运的问题，以及土地租赁带来的影响。她通过人口和工作机会来代表货运供给和实验关系来研究洛杉矶和旧金山的密度与货运流量。她的量化分析得到了相似的结论，通过各种模型和地区来确认密度和货运之间的关系。

主旨演讲之后，潘起胜和赵万民教授代表国际中国规划协会和重庆大学分别为国际中国规划协会凯伦·波伦斯基最佳论文奖，最佳学生论文奖，和国际中国规划协会杰出贡献奖颁奖。

国际中国规划协会凯伦·波伦斯基最佳论文奖授予每年年会中由学生会会员宣读的最佳论文。波伦斯基奖以麻省理工学院教授凯伦·波伦斯基命名，以彰显她在培养中国规划专业学生方面的贡献。2015年凯伦·波伦斯基奖由刘建政（香港大学）获得。他的文章“夜间卫星图形分析民族差异，在中国大陆和台湾的经济较发达地区”，阐述了通过夜间卫星图的创新方法来研究经济较发达地区的民族差异。

国际中国规划协会最佳学生论文奖用于表彰每次国际中国规划协会年会上由中国大学在校学生宣读的最佳论文。该奖每年授予一位学生的

The Karen R. Polenske Award is named in honour of Professor Karen R. Polenske at Massachusetts Institute of Technology (MIT) in recognition of her contribution towards the education of Chinese planning students. It is awarded annually for the best paper presented by a student IACP member at the IACP conference. The 2015 Polenske Award recipient was Jianzheng Liu (University of Hong Kong). Jianzheng's paper, entitled "A Night-time Light Imagery Estimation of Ethnic Disparity in Economic Well-being in Mainland China and Taiwan (2001-2013)", adopted an innovative approach by using nighttime light imagery as a proxy for economic well-being to examine economic disparity among ethnic groups. The 2015 award went to Chen Chen (Tongji University) for his paper entitled "The China Paradox of Migrant Labor Shortage Amidst Surplus Rural Laborers: an Alternative View". Chen's paper examined inter-regional rural-to-urban migration in China. It addressed ongoing important contemporary social issues having valuable implications for Chinese migration policies.

The IACP Excellent Service Award recognizes the outstanding services provided by current and past IACP Board of Directors. The 2015 award went to five former IACP Board of Directors: Qing Shen (University of Washington, 2005-2007 and 2007-2009 BOD), Richard LeGates (San Jose State University, 2007-2009 and 2009-2011 BOD), Jiawen Yang (Peking University, 2007-2009 and 2009-2011 BOD), Lan Deng (University of Michigan, 2011-2013 BOD), and Jiangping Zhou (University of Queensland, 2011-2013 and 2013-2015 BOD). Prof. Yuan Yuan from Sun Yat-sen University reviewed the planning process of a low-income community (Tongde Street) in Guangzhou, concluding that collaborative planning is an effective strategy with which to address the issues in low-income communities. Prof. Yang Xiao, Tongji University, analyzed the distribution of parks in Shanghai, using the concept of access to open space in order to explore the social equity issue of disadvantaged communities. Prof. Miao Xu of Chongqing University contrasted habitat culture and policies on real estate taxes between China and western countries, discussing the uniqueness of gated communities in China. Finally, Prof. Lingyun Fan, Suzhou University of Science and Technology, focused on rural planning and investigated the evolution of social space of rural communities in Suzhou during the process of rapid urbanization. He also examined the and costs and benefits to rural residents' resulting from involuntary urbanization.

After the presentations, Prof. Den then invited the audience to join the discussion. The four professors and audience discussed a variety of new challenges in housing and community development. Due to their keen interest in the topic, they continued their discussion in the hallway after the roundtable session was official ended. 中国教授美国规划院校年会闪亮登场！

金秋十月休斯顿，密歇根大学的邓岚教授和来自中国大陆的四位青年教授在美国规划院校年会（ACSP）上开展了一场别开生面的圆桌论坛。论坛主题围绕着快速城镇化下中国的住房 and 社区发展展开。中山大学的袁媛老师回顾了广州市同德街低收入社区的规划过程，并指出协作规划是解决低收入社区发展问题的有效工具。同济大学的肖扬老师以上海市公园的分布为例，就绿地可达性探讨了弱势群体的社会公平问题。重庆大学的徐苗老师通过中西方居住文化及房地税收政策的对比，阐述了中国门禁社区的独特性。苏州科技大学的范凌云老师以乡村规划为基础，剖析了苏州乡村社区在快速城镇化过程中的社会空间演变并论证了农民在被动城镇化背景下的利益得失。

在邓岚老师娴熟的主持下，四位教授和在场的老师同学就中国城镇化过程中住房和社区发展的相关问题展开了热烈的互动。虽然论坛时间已到，但参会者兴趣盎然，讨论与交流转到走廊继续进行。这些热情洋溢的讨论将中国住房发展与社会建设的新进展带到了ACSP的学术交流平台。

该论坛由国际中国规划学会（IACP）的曹新宇教授发起。IACP希望能以此为开端形成一个固定主题，在未来的年会中发起更多的专场报告与交流！

YANWEI CHAI, Professor from Peking University, and his research group mainly focus on spatial-temporal behavior theory and application frontiers. They testify the theory through four parts: research on the relationship between space-time behavior and urban space; urban lifestyle research based on space-time behavior analysis; social segregation research based on space-time behavior analysis; as well as air pollution exposure research based on space-time behavior analysis. Up until now, they have completed some empirical studies on Chinese cities, such as the danwei study, smart travel service based on space-time behavior, urban life-space planning and urban time planning. They are also working on defining the daily life circle based on individual activity space. At a theoretical level, they are planning to write a book that systematically introduces time-geography in Chinese, as of now, a high-quality textbook about time-geography has yet to be undertaken. Recently, the Urban China Spatial-temporal Behavior Research Network(UCSB), which derives from the 2005 Workshop on Spatial Behavior Research and Planning in PKU, was officially founded during 2015 AAG conference. As the promoter and an active participant, Chai and his research group will contribute to academic communication and collaborative research, e.g. international comparative studies between Beijing and Chicago. ANTHONY K C IP, In 2015 published 'ASEAN-China Partnership and Australasia: Some Challenges and Opportunities', (By Anthony K C Ip, 3 Dec 2015). With ASEAN-China's closer cooperation in 2014, new Silk Ways are being formed. Several city-regions might be emerging to have new development opportunities, including those in South China, ASEAN and Darwin in North Australia. Already a multicultural nation, Australia has been designated a vast Special Economic Zone crossing three states with Darwin as a gateway, although specific visions and missions are still uncertain as of yet. Attracting investments to its remote north will take a significant amount of effort, but China has taken a major move to lease the Darwin Port with some A\$500 million annually. The idea of an Australasia (OZNAAsia) Rail is planned around the new Marine Industry Park, which capitalizes on the rich mari-

time resources in the vicinity. His recent work includes intensive research and development on the potential for cooperation in these regions, with a focus on the Darwin-Adelaide River System. He is exploring new development opportunities. Some of this work will likely be published for sharing, with others to be applied on real world project and program development.
